Multi-manager – the benefit of blends

The Fund provides exposure to a mix of quality investment managers carefully selected by the IOOF MultiMix Investment Team.

The MultiMix Investment Team is experienced in managing multi investment manager funds and consists of research professionals employed to undertake the analysis, selection and monitoring of the underlying investment managers who will manage the underlying assets.

The MultiMix investment approach centres on diversification and growing the value of investments in a way that manages risk exposure. The MultiMix team consider it unlikely that any single manager can provide consistent superior performance across all market cycles. As such a well researched and carefully blended portfolio of leading investment managers should minimise style bias, reduce volatility and provide enhanced risk weighted returns over agreed investment timeframes.
